MICROSURGICAL KNIVES

Performance, Precision *and* Protection

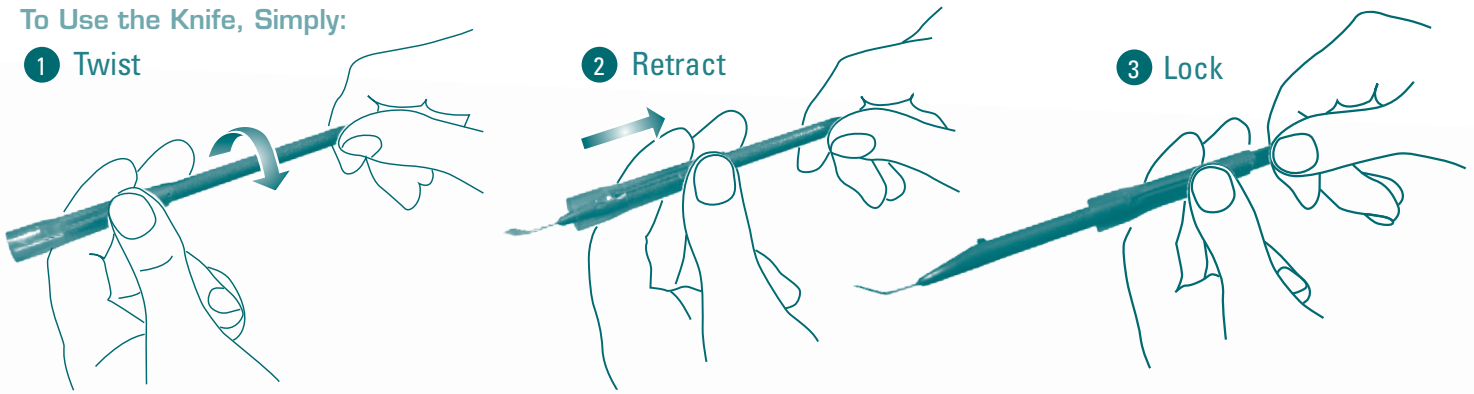

UniqueEdge offers a new line of guarded microsurgical knives that are simple to use, fully retractable and have a locking design that makes safety easy.

- Uses the same handle that you've always valued
- Requires no change in your surgical technique
- Retains maximal feel and absolute control
- Protects your staff from accidental injuries
- Protects the blade from accidental damage
- Part of your OSHA Exposure Control Plan (ECP)

Unique Edge® knives that provide quality and precision are now available with a simple, easy to use guard.

To Use the Knife, Simply:

To Dispose of the Knife, Reverse Steps and Place in a Sharps Container
